Hot, cold, greasy or liquid. Suitable for all **KINDS OF FOOD!**

READY MEALS NATURALLY PACKAGED.

WITH THE BIODEGRADABLE INTEGRATED SOLUTION.

naturesse

TRAY, LAMINATION, LID, FILM

THE FIRST SUSTAINABLE INTEGRATED SOLUTION

The whole world agrees: natural simply tastes better. And this appetite for natural origins begins with the packaging. Thanks to our 15 years of experience in natural raw materials, your ready meals can now be served in a completely sustainable way and free of plastic: the menu trays, the peelable films and even the matching lids are all **made of rapidly renewable raw materials and are biodegradable.**

The naturesse **menu trays** are made of sugar cane fibres and generate around 50% less CO_2 during production than conventional trays (made of part-recycled materials). The **bio-lamination,** which is also naturally biodegradable, protects each tray from water and sauces. In combination with our biodegradable and **peelable sealing films,** or with a lid made of PLA or sugar cane fibres, the natural packaging solution is complete. The wide product range is suitable for every imaginable application and with our easy-to-use sealing machines, your ready meals are also packed naturally in no time at all.

This sustainable **alternative to plastic** is ideal for meals with longer holding times, for dressed salads, sauce-based dishes, juicy meals or even for iced desserts. The ready-meal packaging withstands the cold of the freezer as well as the heat of the microwave and of the oven, and so can also be used to freeze or heat the food. As always, the closure must be removed before reheating. Further details can be found in the application matrix on page 6.

By the way, our range of products also includes menu trays made of the **material kraft,** which is currently **very sought-after.** The sturdy cardboard looks nice, is biodegradable and comes from sustainable forestry with FSC® certification. Combined with a natural PLA coating, kraft is also heat and moisture resistant.

MADE SIMPLE

10 CLEAR FACTS – ENDLESS POSSIBILITIES

- ***Biodegradable*** *integrated solution*
- *Made from* ***fast-growing renewable raw materials***
- ***Plastic-free*** *packaging*
- *Menu trays made of sugar cane fibres generate* ***50% less CO_2*** *than conventional plastic trays*
